vibrofajas®

RECOVERY IN MOTION

Vibrofajas is state of the art compressionwear. Today mere compression is no longer enough and at **GROSPER** we know it better than others.

We are the first innovative concept to add D.O.D (Deep Oscillation Devices) to the most comfortable compression for your patient.

¿what makes our garments the most advanced in the world?

Easy, they provide compression and vibrotherapy at the same time.

With this in mind the recovery of the patient will be more pleasant and brief.

Recovery in motion is recommended by the leading plastic surgery teams worldwide.

vibrofajas®
